

MANAGERS COMMENT

Not many more sleeps left now... Its very exiting isn't it ? --- So would that be the wedding of the century or being a hunter and provider for ones family? Whichever one spins your wheels, its fantastic that Will & Kate had the for-sight and planning to stay away from opening weekend. Very sporting of them ah.

My new iPad2 has finally arrived. Yes another toy to add to the list although I am enjoying using this piece of technology. Watch this space over the next few months as more and more manufacturers release new tablets onto the market. This is one area of technology that is now and will be very competitive as we move forward.

Heaps of viruses still out there so don't let your guard down and make sure your Anti Virus is current and up to date.

You will notice we have slightly changed the layout of our Bits & Bytes. I hope you like it and find it an easy read.

Until May take care and stay safe

Ewen

Tip of the Month

My Blackberry is not working

Printer of the month

Laptops on the move

TIP OF MONTH - WEB PAGE SHORTCUTS

Did you know you don't need the http:// portion of a web page. When typing an Internet address you do not need to type http:// or even www. in the address field. For example, if you wanted to visit our CWC website, you can just type cwc.co.nz and press enter.

To make things even quicker, if you're visiting a .com address you can type the website name and then press Ctrl + Enter to type out the full <http://www.example.com> address.

MY BLACKBERRY IS NOT WORKING

Technology is forever changing and many people sometimes think it's become far to complicated. If this is you then check out this hilarious sketch that seems to put it all in place.

Simply [click here](#) and be prepared to laugh.

PRINTER OF THE MONTH

Multifunction printers are becoming more popular in the printer world. The **Canon Pixma MX410** is an affordable solution which can print, copy, scan & fax for as little as **\$169 inc.** Wirelessly print directly from your Iphone / Andriod device. With quality scanning, and automatic document feeding this is a great versatile all in one solution for your home office.

LAPTOPS ON THE MOVE:

We have seen several laptops in the workshop recently with broken power adapters / damaged laptop ports. To protect your laptop it's best to remove the power adapter when moving the laptop around as leaving it plugged in is a very easy way to damage the adapter or the laptop. Also when moving a laptop a decent distance it's best to shut the laptop down or put it into hibernate. It's not good for the laptop's hard drive to be working while it's being moved around.
